Office Action Summary

Application/Control Number: 10/068,917 Page 2

Art Unit: 1772

1. Applicant's election with traverse of Group I in Paper No. 8 is acknowledged.

The traversal is on the ground(s) that the product can only be made by the process steps implied in the product claims. This is not found persuasive because the product can be made by a materially different method such as injection molding or extrusion and it must be emphasized that the patentability of a product claims are drawn to the structure of the article not the process steps employed to prepare the product. See In re

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Fessman USPQ 324 and M.P.E.P section 2113. The requirement is still deemed proper

A person shall be entitled to a patent unless -

and is therefore made FINAL.

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-4, 6-19 and 21-24 are rejected under 35 U.S.C. 102(b1) as being anticipated by either Hlavaty et al or Ashtiani-Zarandi et al.
- 4. Both references teach a computer controlled stereo lithographic process for forming an article with a lattice structure therein. The unused material used to form the supports or lattice structure can drain away through the supports. Refer to Fig. Nos. 1-4 in both references. Also refer to column 2, line 6 through column 4, line 35 in Ashtiani-Zarandi et al. The references to Hlavaty is substantially the same as Ashtiani-Zarandi et al.

Application/Control Number: 10/068,917 Page 3

Art Unit: 1772

5. Claims 5 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The requirement is still deemed proper and is therefore made FINAL.

Any inquiry concerning this communication should be directed to D. Loney at telephone number 703-308-2416.
